

'V-For-Victory' Ball Slated For Saturday

Tapping, Crowning
Will Highlight
Annual Affair

Scabbar and Blade will present its annual military ball from 9 to 12 p. m. Saturday night in the ballroom of the Union Building, Joe Dunlap, chairman of the dance committee, announced yesterday.

The dance will be known as the "V" for Victory" campaign will be the theme of all decorations.

The ballroom will be lined with small flags and draped with red, white and blue streamers. Two large electrically lighted Vs will be hung over the bandstand. The stairway leading to the balcony will be decorated with Vs and bunting some time this week.

CROWNING OF QUEEN

Pledging ceremonies for approximately 28 candidates from the first year advanced course will be held following the third no-break. The queen of the military ball will be crowned and her attendants will be announced preceding the pledging.

The girl named as regimental sponsor of the ROTC regiment will reign as queen and will have as her attendants the girls chosen as battalion sponsors.

In order to take up as little of the dancing time as possible, the pledging will be simplified by having the candidates and their dates form a large "V" with the queen as its apex. In previous years each man receiving his pledge ribbon from the queen, this year he will have the ribbon pinned on his blouse lapel by his date on a signal from the queen.

SPECIAL NO-BREAK

Following the pledging exercises there will be a special no-break for actives, pledges, and their dates. There will be seven no-breaks including the Scabbar and Blade special.

Committees in charge of arrangements for the dance are: Joe Dunlap, chairman, Royce Taylor, and Billy Black; decorations: Bill Tucker; publicity: Royce Taylor.

They Can't Shoulder A Gun But UK Girls Do Their Bit

By NERITA DODGE

The girls who live in the women's residence halls are doing their bit toward aiding our country in this war even though they can't shoulder a gun. House meetings have been held for the purpose of making the girls more conscious of the effect that their thrift and industry can have upon the progress of the United States. Their motto is, "Every little bit helps," and here's how:

Receipts have been placed in the halls for cancelled stamps which will be collected and sent to a private home in New York. From here they will be sent to London where the dye from them will be sold in order to support hospital beds for the sick and injured children in bomb-torn Queens Hospital. Soon there will be a similar program for the utilization of toothpaste tubes and tin foil.

To save paper, office workers will put one notice on each bulletin board for the information of all instead of sending out individual notices. When it is imperative that individual notices be sent, they will

be written on the back of carefully saved used paper.

The residents are also cooperating by using the smallest amount of electricity possible. Where it is necessary for lights to burn all night low wattage bulbs are being used. Water is also being used carefully.

To prevent excess waste of food, meals are now being served family style, that is, instead of being served on the plate, meals will be served in dishes which will be passed around the table so that each girl may take only that which she wants. Because the dietitians have found that one glass of milk has sufficient calorie content girls only drink one glass per meal. Sugar and other valuable commodities are being used thoughtfully.

Aside from doing their part in the hall life, a great many of these girls have signed up for the Red Cross, surgical dressing, home nursing and other courses offered on the campus. Forty-five girls signed up for the home nursing course alone, and the other classes are rapidly filling up with those who want to do their share while the boys are defending Democracy.

Hey, This Is Really News Engineers Have Three Girls

By NORMA WEATHERSPOON

Conant and Conant, Inc., no longer has a monopoly over the engineering college. Competition has appeared in the form of Margaret Jane Wayne, sophomore transfer from Centre college.

Margaret Jane, 5 feet 7 and brunette, is the third girl to invade the realm of the transit and the slide rule. Her particular field is architectural engineering and she plans to go on to a career as soon as she finishes school.

When queried as to her choice of vocations, she smiled and replied in her husky voice: "Well, I think there is going to be a good field in engineering for women. It's a woman's world now and it would be foolish for us not to take advantage of it. With the men serving the army in Hawaii and the Philippines there will be a shortage of engineers here at home unless the girls begin training along that line."

She first became interested in engineering this past summer, and

with her liberal arts background gained in a year at Transylvania and a semester at Centre she was ready to start into the more technical courses offered here at the University. After two days of fright in which she almost quit, she decided she had made her correct choice.

Besides engineering, Margaret Jane is quite a hobbyist for poetry, walking, and swimming. Herrington Lake near her home town of Danville she describes, with a sigh, as "just paradise." She is interested in costume designing and plans and makes her own clothes.

Her olive skin glowed, her big eyes twinkled, and her engaging smile brightened when she was questioned about having classes with so many of the now-scarce males. "When I tell people I'm an engineering major they all grin knowingly and say, 'Ah! That's where all the men are.' But alas I can't find a cute boy in any of my classes."

EUROPE IS NOW DARK CONTINENT ELLIOT DECLARES

Conquered Nations'
Main Problem
Is Getting Food

If you consider the outlook of the people, Europe—and not Africa—is the real "Dark Continent" of the world today, Roland Elliott, recently returned from a tour of European prison camps and student centers, declared in a talk in the Union building Saturday.

The meeting, to introduce students to the World Student Service Federation, which will conduct a drive for funds on the campus later this spring, was attended by approximately 150 students and faculty members.

Mr. Elliott, who visited France, Germany, Spain, Portugal, and Switzerland on a two-month trip, returning less than three weeks ago, declared that in the conquered nations, food was the main problem. "The French know that it is not the British blockade," he said, "but the fact that 80 percent of all food produced goes to Germany."

Since the Nazi occupation, the French death rate has increased 45 to 47 percent, Mr. Elliott pointed out.

After obtaining enough food to live on, the main problem of students and the people in France today is resistance, the speaker declared—"Everywhere I went and talked to groups behind closed doors, I found a terrific resistance, which is positive rather than negative."

Mr. Elliott found not only in the occupied nations but in Germany as well a spirit of "deep, inner revolt," which was greatly reinforced by the entry of the United States into the war. (The University of Leyden, he gave as an example, refused to open when it was announced that the law faculty would be composed entirely of Nazis.)

The third main problem before the conquered peoples is reconstruction, the speaker said, one of the main sides of which is the great number of prisoners of war.

At present there are in Germany 6,000,000 Russian, French, and British prisoners, Mr. Elliott declared, which is more than all nations held at the end of the first world war.

Of these, 3,000,000 are Russians, most of whom are divided into work companies of 30 to 45 each, and are used for essential labor. Only 15 percent are in concentration camps.

One of the few bright spots in the European picture is the interest of college students who are prisoners of war, he said. In refugee and prison camps there are already established 25 "captive universities," whose students and faculty members are prisoners, but continue their studies.

Mr. Elliott urged as much aid as possible to these students, in the hope that by these means "the best forces may be released for the good of Europe after the war."

COL. ROBERT L. ROCKWELL
and his army air corps flying
cadet board leave the University
today to return in March.

AIR CORPS BOARD EXAMINES 200

Officers Will Leave
At Noon Today

More than 200 candidates for appointment to commissions as army air corps flying cadets were examined by the air corps board at the University, it was announced by Col. Robert L. Rockwell, head of the board.

Examinations of candidates will end at noon today and the board will leave the University to return about March 1, Rockwell added. The flying cadet examining board at the University is now a semi-permanent organization.

According to officers in charge, the board will take men for training as pilots, navigators, and bombardiers, whose ages are between 18 and 26. All those not 21 must have written consent from their parents, authorized by a notary public.

Before taking the examinations, the applicants are required to have a birth certificate or some record of birth and citizenship, three letters of character commendation, and a formal application, which is supplied by the War Department and obtained at the corps desk in the armory, must be filled out.

The only way that the applicant can be deferred is to be enrolled in the advanced military course (paragraph 45).

The new regulations point out that if the cadet "washes out" he is kept as a private and given a chance to fly, formerly they were sent home instead of being given a second trial. The cadet when applying, signs for no definite type of training.

T. Dorsey Records

The music of Tommy Dorsey will be featured at the regular modern music concert at 3:30 this afternoon in the Carnegie Music room of the Union building.

Jim Young, chairman of the modern music committee, has announced that "Blue Skies," "Getting Sentimental over You," "This Love of Mine," and "Stardust" will be highlighted with Frank Sinatra on the vocal.

UNION ENGAGES SONNY DUNHAM FOR SPRING

Band Will Appear
Friday, March 27,
Penick Announces

Sonny Dunham and his orchestra, one of the most publicized of the "coming" bands, has been signed to play for a dance in the Union building on Friday, March 27. It was announced yesterday by Bill Penick, president of the Union board.

"This is the name band we've been trying to book for years," Penick said in commenting on Dunham's contract with the Union.

"Due to the decrease in student enrollment this semester, we had to drop plans for the proposed set of dances and concentrate on having a good band for a single dance," Penick added.

The Dunham dance will be called a Spring formal and will cost around \$1.25, Union officials said.

Dunham's acceptance by the Union was wired to him on Saturday. Price to be paid the orchestra for the engagement is undisclosed.

The band, which is finishing a record-breaking engagement at the Meadowbrook country club in New Jersey, will stop for its date at the University between engagements in Washington and St. Louis.

Ray Kellogg and Harriet Clarke are the featured vocalists with the 16-piece organization. Dunham, who was formerly with Benny Goodman and Glen Gray, plays trumpet and trombone.

Petitions circulated among fraternities and sororities to test student reaction toward a dance set in the spring were well received, Penick said yesterday.

First Local Victim Is Racked Up By 'War-Time'

By JIM WOOLDRIDGE

The University's first "war-time" casualty was Kay Jones, Kernel linotype operator, who said it all happened because he was concentrating on his history assignment.

Kay came in late after working in the print shop, and "concentrating on his history assignment," forgot to set his clock up to daylight saving time.

Jones cut his first hour class so he could get his history assignment. Third hour, he went to military class where there was a movie on equipment. Lackadaisically thinking about his history assignment, he answered "here" three different times when the instructor called "Jones" in roll-call.

Secure in the knowledge of how well he had done his history assignment, Jones went to his fourth hour history class. Everyone else went to lunch. Kay's batting average for class attendance—000.

UK's 'Big Train' Akers Derails Ramblin Wreck As Cats Win, 57-51

WAR QUESTIONS TO BE ANSWERED IN LIBRARY

Committee Meets
In Room 141
McVey Announces

The defense information committee office designated to answer all questions on the war for students and the general public will be located in room 141, Library building. It was announced yesterday by Dr. Frank L. McVey, president emeritus of the University and chairman of the committee.

Members of the committee, which is one of those appointed by President Herman L. Donovan to correlate the University program with the nation's war plan, are requested to meet at 4 p. m. today in room 417, Library building.

Named on the information center committee were, beside Dr. McVey, Prof. George K. Brady, Prof. C. C. Carpenter, Prof. Louis Clifton, Miss Laura Deephouse, Prof. Amos H. Eblen, Miss Chloe Gifford, Prof. E. L. Gillis, Miss Mary Elizabeth Hanson, Mrs. Sarah B. Holmes, Prof. J. S. Horline, Miss Vivien Palmer, E. G. Sulzer, Dean W. S. Taylor, Dr. Lee H. Townsend and Miss Myrtle Weldon.

Memberships of the defense council for men includes: Prof. W. S. Webb, Prof. Jesse E. Adams, Prof. C. C. Carpenter, Major Lysie W. Croft, Prof. C. S. Crouse, Dean A. E. Evans, Prof. George Roberts and Mrs. Alberta Sever.

On the defense council for women, beside Mrs. Holmes, are: Dr. J. S. Chambers, Miss Laura Deephouse, Miss Stacie Erikson, Miss Chloe Gifford, Major Gerald Griffin, Miss Rankin Harris, Miss Jane Haselden, Miss Margaret Lester, Prof. J. W. May, Miss Anne Morrow, O. H. Shedd, Prof. D. V. Terrell, Miss Rebecca Van Meter and Miss Myrtle Weldon.

Enrollment Falls 603

Final registration figures for the semester show a student enrollment of 2895, according to information received from the registrar's office yesterday afternoon. This represents a decrease of 603 students since the same period last year.

Information from the registrar's office also called attention to the fact that March 20 is the last day on which students may drop a class without a grade.

MISS MARGIE

Holds open class today on
"What to See In a Play"

OPEN CLASS SET FOR TODAY

Miss McLaughlin
To Discuss Plays

"What To See In A Play" will be the subject of Marguerite McLaughlin's lecture for the first open class this semester at 10 a. m. today, room 54, in McVey hall.

Miss McLaughlin, an assistant professor of journalism, will discuss the various techniques of critical writing on drama, and give reviews and personal criticisms of Broadway plays she saw during the Christmas vacation.

Open classes, of which Miss McLaughlin's is the first of the current semester, were inaugurated last fall by the arts and sciences college with the purpose of interesting students in subjects outside their own field. Eight other lectures have been scheduled for this semester.

UK AND DE BOOR SETTLE DISPUTE

Field-House Site
Property Cleared

The University-DeBoor controversy over building sites on Euclid Avenue and Adams street was settled Friday afternoon when the city board of adjustment approved a compromise agreement.

M. J. DeBoor was granted permission to construct an addition to the west side of the DeBoor Laundry, 265 Euclid. The board waived restrictions against building within five feet of the property line, which had been in effect because the property adjacent to the plant on the west had been classified as residential.

Thus the property at 256 Adams street will not be affected by the construction. University officials had protested against use of the Adams street site for the addition, saying that it was including in the property on which the University proposed to construct a field house and auditorium.

CHANGES MADE IN SUMMER ROTC

The six weeks military instructional period, usually taken at ROTC camps in the summer by the advanced military men, will probably be taken in infantry service schools following the completion of the two-year advance military work, according to Colonel Howard Donnelly, yesterday.

The usual camp periods are attended by the advanced military men between their junior and senior years in the summer. This new ruling will affect 90 UK juniors taking advanced military training, who were notified last week that the summer camps had been discontinued "for the duration and six weeks after."

Aim of these extra classes is to prepare advanced students better for work with troops after they receive commissions in the reserve corps and go on active duty, military officials said.

SCORES 18 POINTS IN BIG BLUE WIN

Tech's Stevens
And 'Cat's White
Are Ejected

By BOB ADAIR
Kernel Sports Editor

Georgia Tech was just a "whistle stop" for "Big Train" Akers as Kentucky's candidate for All-American honors racked up 18 points to lead the Wildcats to a 57-51 triumph over the Engineers in Alumni gym last night.

The Cats got off to a 6-0 lead in the first minute of play on a crib by Akers and two cribs by Ermal Allen. It looked as if Kentucky would persuade the Engineers to turn their Ramblin' Wreck over to national defense as they went on to take command 11-2 on fielders by Brewer and Akers and a free throw, also by Akers. However, the Yellow Jackets came back to knot the count in the second half after trailing 32-20 at halftime.

A capacity crowd saw the Cats win their second consecutive Southeastern conference clash in defeating Tech. They also saw two players banished from the game for unnecessary roughness after only six minutes of play. Tech's Buck Stevens and Kentucky's Waller White were ejected after each made a charity toss when the double foul was called.

WILDCATS COAST
The Wildcats seemed to be coasting as they ran up a fifteen point margin at 24-9 midway of the first half. However, the Engineers began to gradually whittle away at the Cat advantage as Boneyard Johnson and Captain Carlton Lewis sank fouls. Lewis then hung one in from the side after Ermal Allen had dropped through his third crib of the game to make it 26-13.

King and England replaced Brewer and Staker at center and guard, respectively, for Kentucky just before Gene Snyder hit one from the side for Georgia Tech. Jim King then missed a foul attempt as Jake Lance committed his third personal. Kentucky had a perfect record of eight free throws made out of as many tries at this time.

KING REBOUNDS
The Cats took a 30-16 lead as King made a rebound shot and Ramsey sank two gratis flings while Jim Hearn was making one foul out of two attempts for Tech.

Lewis and Johnson each broke loose to dribble the length of the floor for Georgia Tech baskets to make the score stand 30-20 as the first half ended.

Marvin Akers hit a long one from the center of the floor as play was resumed and Jim King made good one of two foul shots to make it 33-20. Johnson tallied for Tech on a short shot and Akers cashed in on two free throws. Lance hit a foul toss, King made a pivot shot, and Johnson and Lewis scored on fielders to make the score 37-27.

Kentucky called time out as the Cat attack bogged down and Tech took renewed strength as substitute

(Continued on Page Four)

PAPER SHORTAGE MAY HIT CAMPUS

Rationing Cuts
Supply In Half

Due to the fact that the Campus book store is being rationed to 50 percent of the amount of notebook and stationery used last year, students at the University may have difficulty in purchasing school supplies.

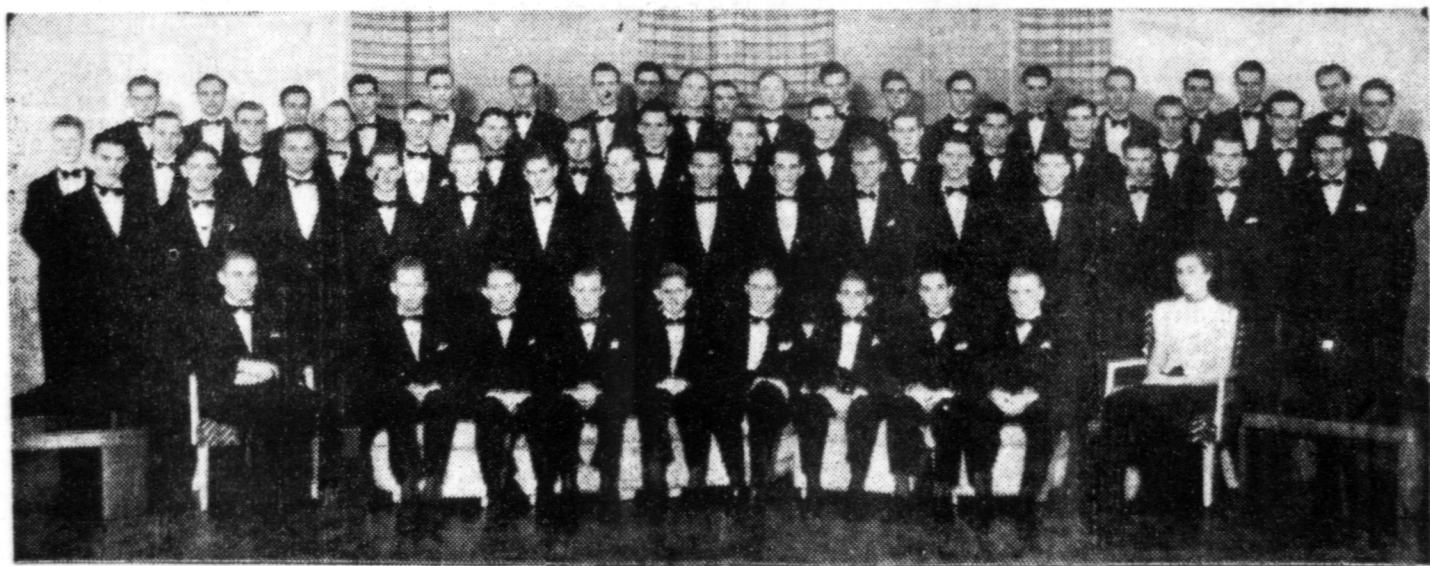

Mr. J. E. Morris of the book store stated that mimeograph, bond and yellow paper, which is handled for the college business offices, have to be ordered six months in advance although there is no definite shortage yet.

The greatest need at the book store is for slide rules which are not available because of the shortage of celluloid. Rubber bands, staples, erasers, tacks and wrapping paper can not be bought at all.

As yet the rationing of Cokes-colas has not hit the University but they are being allowed only 60 percent of the amount sold last year.

Mr. Morris said that although there will be a definite shortage in these supplies the store should not suffer too much because the decrease in enrollment will lower the demand for these articles.

Men's Glee Club Presents Sunday Program

"FOR MEMBERS SERVING IN ARMED FORCES—"

The University Glee Club, under the direction of Donald Allton, gave a concert Sunday in Memorial Hall as part of the regular weekly Sunday afternoon musicals.

By WILYAH GRAVES

Much thought and style were given to the interpretations of the selected numbers presented by the University Men's Glee Club under the direction of Donald Allton Sunday afternoon at Memorial Hall.

A good balance and blend was maintained throughout the program which was dedicated to members who are now serving in the armed forces of the United States. A very effective lighting and stage decoration was presented. Attacks and releases were given to each number. Words were sung very distinctively.

Before the first group of numbers was presented the national anthem was sung by the glee club. "Pierce was the Wild Billow" by Noble was majestic and mysterious and was sung most artistically. An old hymn, "O God Our Help in Ages Past," was presented in an interesting manner with part of the accompaniment played by the organ.

Highlight of the second group of all American music was the novel Tennessee mountain song, "Kemo Knows the Trouble I've Seen," which was a real tongue twister. An American Polk Song, "The Erie Canal," illustrated the

syncopated rhythm of the northern folk music. "Old King Cole," a novel number, modernized nursery rhyme concluded this group with "The Animal Fair" as an encore.

The third group consisted of negro spirituals with the last number, "Malotte's Pledge to the Flag," especially dedicated to the former glee club members.

Other numbers on the program were "The Lord's Prayer," "Come to Me in My Dreams," "Home on the Range," "Heaven Bells," "Nobody Knows the Trouble I've Seen," and "Wade in the Water."

The program was as follows:

- I
Alma Mater ————— Lampert
Pierce Was the Wild Billow ——— Noble
The Lord's Prayer ————— York
O God Our Help in Ages Past ——— arr. Davis
- II
Come to Me in My Dreams ——— Noble Cain
The Erie Canal ————— American Folk Song
Home on the Range ————— American Cowboy Song
Kemo Knows the Trouble I've Seen ——— arr. Paul Towner
Old King Cole ————— Paul Towner
- III
Negro Polk Songs:
Heaven Bells
Nobody Knows the Trouble I've Seen
Wade in the Water
Three Negro Spirituals ——— arr. Bartholomew
Pledge to the Flag ————— Malotte

THE WHITE CLIFFS OF DOVER, 1942 —
AND THEM AIN'T BLUEBIRDS, EITHER.

Defends Choice Of Orchestra For Scabbard, Blade Dance

To the Editor of The Kernel:
Mr. Editor, maybe you can tell me why we have to have "Q. P.'s" on this campus. Q. P.'s are certain people who aren't versed in their subject but try to write about it anyway.
First of all, I believe that I cannot commit either libel "per se" or "per quod" in this letter since I do not know to whom I am writing. In this respect, I think that some time ago you yourself entered a small item on the editorial page to the effect that no letters would be printed unless they contained the signature of the writer.
Perhaps Mr. Q. P. is some self-styled big-shot, who became exceedingly courageous when he found he could write a letter to the Kernel without signing his name. Perhaps he is some military stu-

Coats Aren't So Eloquent Now

VICE OF THE PEOPLE By ROY STEINORT
Sartorially, VICE OF THE PEOPLE appears to be a newspaperman this morning.
Newspapermen have long been recognized for their ineloquent appearance—their tattered and frayed clothes combined with their weird combination of garb has stamped them a very unusual lot, sartorially speaking.
This collegiate columnist, fearing that he might be caught in the draft most any hour now, has sadly neglected his personal appearance of late.
Often you've heard the story of the boy who sat on an Indian headed nickel. He could spot whether it was heads or tails, his pants were so thin.
I can match him in the thinness of my pants. If it's heads I can tell you if he shaved before or after breakfast and believe me, that is a very thin covering over the lower portion of your anatomy.

The eloquent dressers that roved our campus last year are not to be found this winter. I could name them, but I fear the same consequence that befell another Kernel columnist who poked fun at the fraternity boys with the checkered sport coats.
Remember those ads that appeared regularly in The Kernel last year. Buy this suit tailored to suit your personality and be a BMOC.
They, like the checkered sport coats, are quite conspicuous by their absence and, according to the campus representatives of local stores, it can all be blamed on those teetly little individuals who are making war on us.
Those odd combinations of pants and coats that you have noticed crossing the campus lately are a direct result of the war. The male students, generally speaking, are waiting for that well tailored brown suit that our dear Uncle will present us with—free of charge.
And after all, you can't blame a fella for

Jim Brown He Will Miss His First 'Cat Home Game In Five Years

LIFE'S DAILY PARADE By JAY WILSON
TUCKED AWAY at one end of the press bench at the game Saturday night was a quiet, unassuming young man who closely followed the course of the game and Kentucky's excitable Mr. Rupp, laughing, groaning, and living every moment of a hard won game as with an old friend—five years old to be exact.
It was five years ago that Jim Brown, former Kernel sports writer, came up from Shelbyville to see his first Wildcat basketball game. Since then he hasn't missed a single performance on the home court.
First—from the back of the packed gym, (on the days when he came from home) and later (on enrolling in the University) from the better seats nearer the floor—he steadily worked his way toward the players' bench.
Finally, he began covering the home games for the Kernel and obtained a seat near the Wildcat players.
Actually, he might have been one of these boys himself. An outstanding high school basketball player, he turned down a scholarship at Eastern in order to major in journalism at the University.
Monday's game with Georgia Tech and the last home game with St. X. will find Jim again on the sidelines, adding two more games to his already lengthy list.
But when the Southeastern Con-

Kernel's Policy On All Letters To The Editor

In the interests of free expression of opinion, The Kernel always has and always will maintain an open editorial page for letters to the editor. In this line, we repeat here the traditional Kernel policy on this subject:
1) We will publish any and all letters submitted, provided they are not libelous, seditious, or treasonous;
2) The writer's name must be signed, but if he wishes, it will not be printed and will not be revealed;
3) The Kernel reserves the right to edit any letters over 300 words in length, to meet space requirements.
4) It is understood, of course, that the opinions expressed in letters do not represent the opinions of The Kernel but those of the writer alone.
—The Editor.

Disapproves Of Scabbard, Blade's Choice Of Band

To the Editor of The Kernel:
May I add my disapproval of the manner in which Scabbard and Blade is treating the students in regard to their Military Ball. It seems the boys have gone out to take the student body for a ride by bringing in this definitely no better than mediocre band.

Recent Draft Registrants To Be Called Last Of All

KEEPING UP WITH THE SERVICES By JIM CARROLL
Approximately a million men became part of the vast army of the United States yesterday as the men between the ages of 20 and 44, not previously registered, were listed on the draft roster.
Another registration is expected in the next two or three months which will list the men from 18 to 20 and 45 through 64. This should bring the army's potential manpower near the 42,000,000 mark.
It has been announced by the Selective Service headquarters that the new names which were added on the rolls yesterday will not be called until the lists of previously registered men have been cleared.
It was earlier announced that the newly registered men would be "Sandwiched" with those previously registered so as to provide an equal chance for the call to service.
POSITIONS OPEN
IN GROUND STAFF
The air corps which realizes the

UK Administration Has Not Approved SGA Amendment

To the Editor of The Kernel:
There has already been expressed by the administration willingness to approve the amendment providing a majority of students on committees of the SGA, reducing the number of faculty members to two on each committee, making the student chairman directly responsible to the president of SGA, and reducing the number of committees. When the present constitution was approved by the Senate, the Discipline Committee and the Social Committee—both composed of faculty members only—were eliminated. It seems wise that the faculty representation should be continued through the committee system.
The amendment as printed in the February 13 issue of The Kernel has not been approved by the administration. I make this statement because certain news stories have seemed to give that impression.
HENRY H. HILL
Dean of the University

all lands together in spirit. They are bound together more practically, one might say, by the ever-advancing knowledge of humankind, as represented particularly in its science. Men of science have always been and still are the most natural and confirmed of internationalists. They work with one another over every frontier and shamelessly appropriate from one another whatever new knowledge any seeker, in any field, gains. There is no such trifling conception as plagiarism here.
Neither can the faith of men in one another be prisoned within national boundaries. A justified reliance upon economic promises—what economists dismissively call "debt-and-credit system" is at the root of human civilization, the explanation of both its growth and its present intricate organization.
DEBT AND CREDIT
Debt and credit have never, from the remotest past, recognized any frontier. They have flowed over all, tying men of one land to men of another. The ceaseless streams of goods now flowing between all nations are matched by something invisible—the performance, perpetually justified by confidence, of all the participants in one another.
This closest of economic relationships, debt and credit, has built up and still maintains human society in its planetary economic indivisibility. It might also be likened, in its unseen unifying effect, to the all-enveloping deep layer of air over the planet by which, physiologically, all human beings alike are kept alive. So the debt-and-credit system—knowing no frontier—keeps human society functioning and alive.
STILL MOVING
Mankind is still moving, and moving fast, on this road of world economic unification. Think how the airplane carrying freight will alone intensify it within the next twenty-five years! It has not been by chance that a single metal, gold, has come to be used by every nation to measure, directly or indirectly, the value of its paper money.
And is it any wonder that those rhythmic business cycles which still have great elements of mystery to the most careful economists, are now Earthwide phenomena; that all the world prospers together, suffers together—and complains together—as they occur? Modern human society is an economic whole.

He Does His Part, Gets Soaked \$5

These two clippings from Lexington newspapers should illustrate what we meant last week when we said the people of America still weren't awake to the fact that the country is at war and that "normal" ways of doing things will have to be modified:

FARMERS ASKED TO SELL SCRAP TO AID DEFENSE

Farmers today had been urged by James M. Sharp, chairman of the Fayette County Agricultural War Board, to gather scrap metal at their farms and to sell that material to dealers immediately.

"Your government needs this material," Mr. Sharp wrote.

—Lexington Leader, February 13.

HAULING SCRAP BRINGS \$5 FINE

Lloyd Thompson, Scott county farmer, yesterday had been fined \$5 and costs for hauling junk in a farm truck.

Thompson (was) tried in the court of Magistrate Frank Bromley and adjudged technically guilty of violating a state law that restricts the use of motor vehicles licensed as farm trucks.

—Lexington Herald-Leader, February 15.

How-Times-Do-Change Department

"War between Japan and the United States is not within the realm of reasonable possibility."
"A Japanese attack upon Hawaii is a strategic impossibility."
—Both from an article entitled "The Impossible War Between Japan and the United States" appearing in the September 1938 issue of "The American Mercury."—B. B.

SOUR NOTES In The New World Symphony

"Government press agents . . . have been ordered to single-space their mimeographed copy for the press in order to save paper . . . when they are all well aware that all editors hate single space copy like the devil hates holy water because it is difficult to edit and provokes profanity in the composing room. If the order is enforced it means that more products of bureau and departmental propagandists will go into the wastebaskets."—Jackson (Mis.) News, reprinted in Lexington Leader.

EDITOR'S NOTE—The Kernel dislikes single-spaced copy as much as anyone else, but if the pulp is needed for certain types of munitions—as we are told—we guess we'll just strain our eyes a little more and save our sour-notings for something else.

To the Editor of The Courier-Journal.

I have no patience whatever with those simpletons who would show mercy to the Japs. They are fiends and inhuman and should be treated as such. I hope our Government never takes any of them prisoners. Senator Glass was correct, as he is about many things, when he said, "We don't want to hurt 'em, we want to kill 'em." There is just one way to get rid of them.

Central City Ky. COMMON SENSE

"In a recent meeting of governmental officials to discuss censorship . . . the state department representative proposed that a ban be clamped down on criticism of the state department's activities and policies. He particularly mentioned criticism aimed at the department's constant appeasing of Vichy."—Reported by Pearson and Allen.

Backgrounds Of War And Peace

THE LAST BEST HOPE ON EARTH

By HARRY SCHERMAN

(This is the second installment of Mr. Scherman's popular "Philosophy for the War," offered as an introduction to THE KERNEL's series of "Backgrounds of War and Peace," which will be composed of articles written by University of Kentucky faculty members. Mr. Scherman's piece is reprinted with permission of Reader's Digest and Random House, Inc.)

Goods are the great travellers over the Earth's surface, far more than human beings. Little men can be conceived of fancifully, as merely conveying the goods in their now well-settled streams. Endlessly these streams of goods criss-cross, as on Martian canals, with hardly an inhabited spot on the globe unvisited.

From our own boundaries, for example—taking merely the principal items—grains and other foods flow endlessly to feed numberless foreign mouths; tobacco products to solace hundreds of millions; moving pictures to amuse them; cotton to clothe them; oil to keep countless machines other than our own moving; and—of greater value than anything—machines themselves in fascinating variety, the best in the world.

While this is happening, as the largest station for incoming goods on the globe, other great streams of goods cross these out-going ones; sugar, cocoa, coffee, bananas, spices, and a hundred other foreign goods; rubber from the East Indies; tin from there, too, and from Bolivia; furs from Russia; timber and pulp from Canada; from all the seven seas, metals and minerals to keep our myriad industries whirling; silk from Japan and flax from Ireland; luxuries from Europe. This is also true of every other people.

PRINCIPAL EXPORTS
Here, as raw material for reflection, is the roster of the principal exports of the different nations of the world. There are numerous other articles, of course; some of them—though their quantities be small—indispensable to keep industries going and men employed in other lands.

Australia—Food and wool
Austria—Timber and paper
Argentina—Cattle, hides and wheat
Belgium—Food, textiles, coal and machines
Canada—Grains, metals and minerals
Brazil—Coffee and cotton
Ceylon—Tea and rubber
Chile—Nitrates and copper
Colombia—Coffee and oil
Cuba—Sugar and tobacco
Czechoslovakia—Food, textiles, metal and machines

ARMY AIRPLANES . . .

"Copper from Chile, rubber from the Indies, silk from the Orient, cork from Spain, wood from Canada."

France—Textiles, metal and luxuries
Great Britain—Textiles, coal and machinery
Greece—Tobacco and raisins
Haiti—Coffee and sugar
Hungary—Wheat and livestock
India—Tea, nuts and jute
Holland—Manufactured products
Netherlands—Indies—Rubber and oil
Iceland—Food
Italy—Manufactured products
Japan—Silk and textiles
Mexico—Oil and rubber
Norway—Fish, paper and metals
Peru—Copper, oil and cotton
Philippines—Sugar and copra
Poland—Wood, fuel and base metals
Portugal—Food and wood
Rumania—Oil
Soviet Russia—Wheat, furs, wood, oil and metals
Yugo-Slavia—Food, wood and metals

There is one immense fact so simple that often some "experts" tend to become unconscious of it, like the air we breathe. This inconceivable variety and mass of goods are ceaselessly being produced within each nation for others outside its borders. Multitudes of men are so employed, and it is the needs of foreigners which keep them employed. Indeed it is these needs which have actually called into being a large portion of the enterprises and occupations.

THE OTHER HALF

This, however, is less than half the story of interdependence. The livelihood of hundreds of millions of

others is maintained, very often created, by incoming products from other lands. It would be hard to find a common article of use in any advanced nation the price, quality or constitution of which does not in some measure, and often critically rest upon products emanating from foreign sources.

An immediate example that will occur to everyone is the automobile. It has transformed the modern civilization and particularly American life. What would have happened in this momentous economic development without rubber from the East Indies? Or, in other lands, without oil from the United States and a few other countries?

Taking all boasted technological advances of the past half century, the same pointed question can be asked of some plant, some metal, some substance, some article of manufacture, some invention that has been used to enrich the entire earth and not a single people. The incontestable truth is that there is a clear planetary indivisibility of production and employment.

CULTURE, SCIENCE

But the bonds among men go far deeper than goods. Culture too knows no frontiers, and never has. I do not refer to the arts—to music, painting, great literature. These graces of civilization bind men of

G-E Campus News

VOLTS AND VITAMINS

THE General Electric industrial X-ray laboratory recently moved a large number of apple and other fruit trees, berry bushes, and tomato and string bean seeds into the confines of its workrooms.

There, under an X-ray machine, these various specimens of flora were bombarded with 1,000,000-volt X rays. They were then returned to the New York State Experiment Station at Geneva for planting and subsequent observation of the effect of the X rays upon the color, size, flavor, quality, resistance to disease, and other characteristics of the fruit and vegetables.

Variations and mutations are to be expected when living plant cells are subjected to bombardment with X rays. Under forced germination, effects of the 1,000,000-volt treatment on seeds may be

observed within a few days, but, for the young trees and berry bushes, the full effect will not be known for at least five years.

UNDER ONE ROOF

THE General Electric Company has a leased-wire communication system which functions as smoothly as if all G-E branches were housed in a single building.

During the year 1941, a total of 3796 miles was added to the leased-wire communication system to help speed the handling of contracts. A network of 11,565 miles is now available for telephone and teletype messages.

The telephone network covers 2630 miles and serves 17 key industrial cities in the East and Middle West. It contains 37 individual wires, many of which can be interconnected for greater flexibility and coverage. The teletype network comprises 4822 miles of full-time circuits and 1113 miles of part-time circuits. Thirty-one cities are served directly, and many others are served indirectly.

GENERAL ELECTRIC

Girl's Rifle Team Could Match The Martins And The Coys

By ROYCE TAYLOR

Lexington doesn't need to worry about a parachute attack, because here at the University there is a modern set of "Annie Oakleys" that like the Martins and the Coys "could knock their eyes out at ninety feet."

All girls interested in firing on the Women's Rifle Team will meet in room 206, Buell Armory at 5 p. m. Tuesday, Ann Hatter, WAA manager announced yesterday.

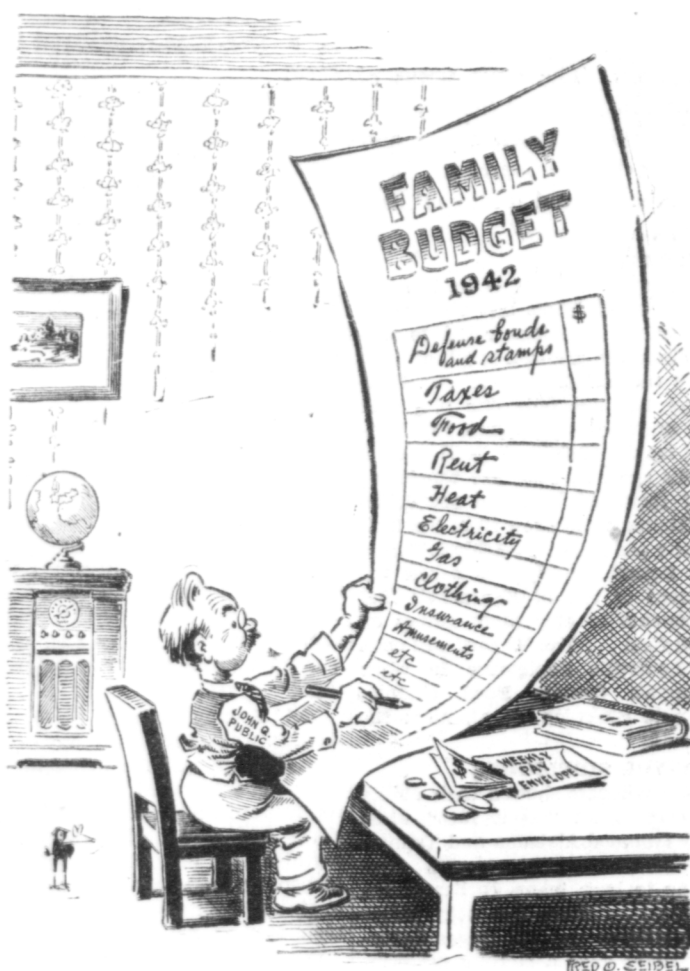

Founded about seven years ago, the team reached its peak last season. Shooting a total of 23 matches, the girls won 20, tied 2, and lost only one. The average team score was 498 out of a possible 500. The majority of matches are correspondence matches, the team firing its targets on the range in the army and sending the scores to the opponents by mail.

Last season the team won 4 shoulder to shoulder matches against the University of Louisville, Louisville Rifle Club, and an American Legion Junior Auxiliary team from Cincinnati. The university team engaged the latter at Cincinnati, and in a post season match here.

Although no matches have been scheduled for this year so far, the team manager has received challenges from the University of Cincinnati, University of Michigan, Pennsylvania State College for Women, Louisiana State, Ripon College, University of California, University of Wichita, Cornell University, and University of Hawaii. The island University was defeated last year by the UK team and will be engaged on the schedule again this year if the war permits correspondence between the two schools.

The team is sponsored by WAA and is classified as a major girl's sport on the campus. Scabbard and Blade, national honorary senior

AT THE TOP OF THE LIST

—From the Richmond Times-Dispatch.

military fraternity, furnishes coaches who serve as range officers and train applicants in rifle marksmanship. This year's coaches are Royce R. Taylor, Lynn Annen, and Henry Hillenmeyer.

LT. John L. Carter, coach of the ROTC, varsity and Pershing Rifle teams will meet with the group Tuesday and give a brief talk on safety rules and the value of rifle marksmanship. The training program, schedule of matches, and hours for range practice will be discussed at the meeting.

Duncan To Head

Beverly Duncan, Ashland, was elected president of the Norwood society, University branch of the American Institute of Mining and Metallurgical Engineers, at a recent meeting.

Other officers elected were George Orton, vice-president; William D. Danks, secretary; John P. Sheehan, treasurer, and John Wilson, sergeant-at-arms.

ALUMNI NEWS

THEN and NOW

PERSONALITIES

BRABANT ELECTED TO STATE AGRICULTURE POST

The new president of the Kentucky Association of County Agricultural Agents is Stuart Brabant, a UK graduate of 1925, elected at a recent meeting of the organization. Mr. Brabant is a native of Elkton.

Major William H. Hanson, graduate of the class of 1924, was recently transferred from the manpower division of State Selective Service headquarters to the post of provost-marshal at Fort Knox, according to information received at the Alumni office.

A reserve officer and World War veteran, Major Hanson is fitted for his new duties as Knox "police chief" by his experience in organizing and establishing the Department of Safety for Kentucky in 1936 and serving as director and executive director of the state highway patrol from 1936 to 1940. He has been on active duty with draft headquarters since September, 1940.

Appointed second lieutenant in April, 1918, Major Hansen has served in the service command organizing various national Army replacement regiments and motor transportation units throughout the country.

He later organized the Student Army Training Corps at Transylvania College. From 1921 to 1936, he served as instructor and later assistant professor, in the department of physical education at the University of Kentucky.

BARNEY WILSON TO JOIN AIR CORPS

Another UK graduate, Barney Wilson, class of 1938, has been notified by the War Department to report for Army duty. He will serve as physical education instructor in the Air Corps at Maxwell Field, Montgomery, Alabama.

Mr. Wilson, after receiving his master's degree at the University, served as head coach of Hall High School, Harlan county, until September, 1940 when he assumed teaching duties at Union College, Barboursville.

Recognized as one of the outstanding basketball officials in the state, he worked the State High School Basketball Tournament in 1941. Mr. Wilson was director of this year's Kentucky High School Athletic Association clinics.

BURKEL-GARLING WEDDING IS SOLEMNIZED

The wedding of Miss Lois Burkel, daughter of Mr. F. H. Burkel, Louisville, and Lieut. Norman C. Garling, graduate of 1937, of Louisville and Chicago, was solemnized January 28 in Louisville.

Miss Burkel attended Nazareth College. Lieutenant Garling is a member of Sigma Alpha Epsilon social fraternity and Omicron Delta Kappa, senior men's honorary here at the University.

ALUMNI TO HOLD BUFFET DINNER

The UK Alumni association of Louisville will entertain with a buffet dinner meeting at 412 Fehr Avenue Tuesday, February 24, to discuss graduation awards to local high schools and ways to increase Alumni membership. Grover Creech, '20, president, announced.

Alumni planning to attend the dinner, at which reservations for the Southeastern Conference basketball tournament may be obtained, should reply to Mr. Creech at 2512 Seneca Valley road, Louisville.

ROTC SPONSORS ARE ELECTED

Regimental, battalion, and company sponsors for the University military units will be selected from a group of 15 women by Colonels Paul C. Paschal and Howard Donnelly, and Major Gerald Griffin.

The selection will take place at a meeting to be held at 4:30 p. m. tomorrow in room 203, Barker hall.

Elected by junior and senior military students, the group from which the sponsors will be chosen includes: Gene Ray Crawford, Almee Murray, Alpha Gamma Delta; Geneva House, Jacqueline Gevedon, Marcia Willing, Alpha Xi Delta; Caroline Conant, Chi Omega; Ann Austin, Marjorie Schwartz, Delta Delta Delta; Louise Ewan, Marjorie Randolph, Kappa Delta; Sara Ewing, Kappa Kappa Gamma; and Maureen Arthur, Josephine Baldauf, Adaline Stern, and Lida Stoll, Independents.

Phi Taus To Fete

A group of rushes of Phi Kappa Tau were honor guests at a theatre party given by the members of the fraternity Friday night at the Kentucky theatre.

Following the show the group went to the chapter house where they were entertained with a smoker.

John Doddridge and Lloyd Waddell made the arrangements for the rush party.

Studio Buys New Recorder For UK Net Broadcasts

The University of Kentucky Radio studios is acquiring a high fidelity Fairchild recorder with which all programs originating from the University studios over WHAS, Louisville will be transcribed for broadcast over that station. Elmer G. Sulzer, director of radio activities announced today.

Due to the exigencies of national defense, which require every available phone line for government use, the College of Agriculture broadcasts, aired Monday through Saturday from 12:50-1:00 p. m.; the Wildcat Review broadcast from 12-12:30 p. m. every Saturday, and Home Fires, a Sunday presentation from 12:00-12:30 p. m., which were formerly transmitted by telephone line to the WHAS studios in Louisville, will be transcribed and sent to Louisville.

It is emphasized that the change, which is tentatively scheduled to take place March 1, will not alter the air time of any WHAS programs from the University studios.

Aside from the fact that the telephone line will be released for de-

fense activities, the high quality of the recording equipment to be purchased will give a more faithful reproduction of tone than the line.

The equipment, which has been ordered from the Fairchild company, includes two 16 inch dual speed turntables, an amplifier, equalizer, and loud speaker.

A permanent installation, in a metal cabinet and modifications in the equipment will be made by J. Emmett Graft of Louisville.

The Radio studios also announce plans for the location of another in its system of mountain listening centers at Napier, Kentucky located in southeastern Leslie county on Greasy creek.

The new addition will be the thirty-ninth in the University's system, and the ninth in Leslie county. The center will be located approximately one mile north of Napier post-office and will be in charge of Mr. Dewey Lewis.

Other centers in Leslie county, where neighbors can come in and listen to radio programs are located near the post offices of Saylor, Moxelle, Roark, Frew, Wootton, Stinnet, Chappell, and Bledcoe.

WARE HEARS CONCERN PRODUCING WAR MATERIALS

Louis Ware, a mining engineering graduate of the class of 1917 and a former resident of Somerset, is president of one of the nation's leading war-production concerns, the International Minerals and Chemicals Corporation. This corporation is in the midst of an expansion program designed to provide war materials for the nations, and is located in Chicago.

The company is now engaged in constructing a \$14,000,000 plant at Austin, Texas and a \$700,000 phosphate plant at Mulberry, Florida. Plans are also being made to open up a new mine and erect a plant at Mount Pleasant, Tennessee.

Ware has held various positions including Chief Engineer of the Iron Cap Copper Company in Arizona; and president and director of the United Electric Coal Companies in Du Quoin, Illinois.

A member of the Delta Chi social fraternity, Mr. Ware resides at 19 Woodley Road in Winnetka, Illinois.

Alpha Gams Honor

The members of Alpha Gamma Delta honored a group of rushes with an informal party at the chapterhouse Saturday afternoon.

Carolyn Petrie, rush chairman, was in charge of the plans for the affair.

Alpha Xi Rushees To Be Entertained

A group of rushees of Alpha Xi Delta will be entertained by the members of the sorority with a party from 4 to 6 o'clock this afternoon at the chapter house.

Decorations will be carried out in the colors of red, white and blue, in keeping with George Washington's birthday. Refreshments of punch and cookies will be served during the afternoon.

About 30 guests will be welcomed and Jean Reynolds, Ruby Jo Gevedon, and Betty Jane Chapman are making the plans for the party.

Delta Zeta Meets

"Men and Women in Defense" was discussed by Laura Deephouse, Home Economics instructor, at the weekly Delta Zeta standards program yesterday at the chapter house.

Gene Gardner, standards chairman, was in charge of the meeting, and refreshments were served.

Intramural B And C Leagues See Action Over Weekend

All 'A' League Games Postponed To Later Date

Intramural basketball slowed down considerably over the weekend, since all games Friday and Monday were postponed for various reasons. However, there was plenty

of action in the B and C leagues Thursday evening.

The Sigma Nus functioned smoothly and effectively in subduing the Phi Taus, 22-10, as Hope and Clark found the range for eight and six points respectively. Leading at halftime, 12-1, the game was never in doubt. Coe sank five points for the losers to gather half his team's total.

J. J. Buckley took Kappa Sig honors by netting five points, while he and his teammates, together, trounced the Deltas, 17-5, in a slow ball game. Campbell made three for the Deltas, but couldn't get his team working. The Deltas were trailing 10-0 at the halfway mark.

SAE'S CLICK

SAE had little trouble in trouncing the Sigma Chis, 17-6, in another B league game. Although the score was tied at half-time, 4-4, the game was much faster than the score indicated. Neither team came close on their shots until Freddie Wachs started hitting in the last half. Wachs led the scoring with 10 points, followed by Evans with five. Thornbury made four to lead Sigma Chi.

After a slow start, ATO, the fat man's team, began hitting to defeat Triangle 16-3, in a rough encounter. The two fast breaking forwards from ATO, Walsh and Ross, played an excellent floor game, but Center Bob Plaga got away with seven points to take scoring honors. Martin scored all his team's points.

In the closest game of the evening, the Kappa Alphas nosed out the Phi Deltas, 11-10. The ability of the KAs to make charity tosses gave them victory. They made good five out of eight chances, while Phi Deltas missed six out of six. Captain Addison Lee led the KAs with seven points, and Walker made four to lead the Phi Deltas.

TWO 'C' GAMES

Only two games were played in the C league Thursday, and both the games were won by onesided scores. ATO used its entire squad in smothering the Sigma Nus, 34-4.

and the Alpha Gamma Rhos had little trouble in dropping the Deltas, 14-3. SAE won from Phi Sigma Kappa on a forfeit.

Barnard made six field goals to lead his ATO aggregation, and Lindsey made two fielders to score all the Sigma Nu points.

Pettus made six markers, and Clark and Hatcher four each, to lead the AGRs to victory over the Deltas. The Deltas made all their points on fouls. Jones made three.

No date has been set for the postponed games, but Czar Hackensmith and Louis Schwartz are working day, and night, attempting to find an open date. They both promise that something definite will be out within the next few days.

BOOK STORE OPENS LATER

Jimmie Morris, manager of the campus book store, announced today that the opening hours have been changed to 8:30 a.m. in place of 7:45 a.m. as they have been in the past. The post-office, located downstairs in McVey hall, will also operate under this new schedule.

Closing hours will remain the same. Under this new ruling, the book store and post-office will operate from 8:30 a.m. to 5 p.m. Monday through Friday, and 8:30 a.m. to 12:30 p.m. on Saturday.

All patrons of the book store are asked to comply with the new change as it is being carried on to assist those who are employed in the store, as well as to conserve electricity and commodities during the national emergency, Morris said.

Engineers In Yellow Pants Bloom Like 'Daffy-Dills'

By TONI STABILE

If you're wondering—and who isn't—those aren't daffodils blooming on the campus. They're yellow trousers belonging to the senior civil engineers, some 15 buddies who with the characteristic independence of the group, like them and don't give a damn what others think.

The 'wearing of the yellow' is an age-old tradition of the slide-rulers which honors its civil engineering seniors by allowing them to wear bright yellow trousers to distinguish them from other species—human or otherwise.

The custom has been revived after ten years of dormancy on the UK campus. Other institutions of engineering throughout the country have been more consistent in observing the tradition.

This year, UK has been invaded by the 'yellow-trousers' as a result of a suggestion by two tradition-loving engineers at a meeting.

The suggestion was acted upon by giving a down-town store an order to make up the trousers. A

KERNEL SPORTS

The Sporting Way

BY BOB ADAIR

It is hinted that the Southeastern conference may follow the example of some of the smaller leagues and make freshmen athletes eligible for varsity athletics. If such action is taken, Coach Adolph Rupp may depend heavily upon first year men for his Wildcat cage teams the next few seasons. The draft status of present squad members is somewhat of a headache to the Maestro. He says, "With the air corps calling for 50,000 men a year and draft boards taking youths regularly by the thousands, my little boys may be dribbling in for a crip any day and meet the mail-man on the way."

HARD SCHEDULE ON GRIDIRON FOR '42 'CATS

Kentucky's gridiron 'Cats face one of the toughest schedules in the south this season opening against Transylvania college voted to discontinue the gridiron sport, at least until the end of the war. . . . Kentucky has lost only one player in the draft so far, fullback Bill Kincer taking the army, trail several weeks ago. . . . Fans are wondering why freshman backfield ace John Melhaus withdrew from the University suddenly. . . . Athletic Director Bernie Shively has asked the consent of two of Kentucky's 1942 opponents to play night games on Stoll field. . . . The '42 card will open at Louisville September 19 when Georgia's Orange Bowl champs, Frankie Sinkwich, et al, meet the Wildcats.

George Washington and Georgia are by no means new faces to the 'Cats since both were played in 1940. That year Kentucky defeated the former, 24-0, on Stoll Field, but had to settle with a tie against Georgia and Athens, 7-7.

The complete schedule is as follows:

Sept. 19—Georgia—at Louisville
Sept. 26—Xavier—at Cincinnati
Oct. 3—Washington and Lee—Home
Oct. 10—Vanderbilt—Home
Oct. 17—V. P. I.—Roanoke, Virginia
Oct. 24—Alabama—Home
Oct. 31—Geo. Wash.—Wash. D. C.
Nov. 7—Georgia Tech.—Atlanta
Nov. 14—West Virginia—Home
Nov. 21—Tennessee—at Knoxville

Betty Roberts Is Praised On Song In Boston Paper

By Archie Rainey

Just now is the nation-wide response to Betty Wells Roberts' songs being felt. She appeared on Fred Allen's coast-to-coast radio show last November, and since then compliments have come from all sections of the United States. Her most recent boost came from the George Holland column "Boston

After Dark" which appeared a few weeks ago.

From his column:

"Once over lightly: Boston's greatest gift to radio, Fred Allen, is becoming a Columbus of the airwaves, succeeding that other eminent discoverer of talent, Rudy Vallee. . . . Fred's talent quest in the colleges is unveiling one young "find" after another. . . . His latest was a girl elected by the University of Kentucky to carry that institution's standard in the national competition. . . . If she's as beautiful as Fred described her, she should be a sure-fire bet for pictures. . . . But a radio job would seem to be the least she might expect. . . . Her name is Betty Wells Roberts—tab it. . . . Her voice is better than was Libby Holman's, when Libby was at her best. . . ."

Betty Wells was chosen as UK's most talented under-graduate in the competition held here last fall. On the Fred Allen program she sang "Night and Day."

She is a senior in arts and science, majoring in romance languages, a member of Kappa Delta sorority, and an ROTC sponsor. She is also a member of the French Club, and Phi Beta, music honorary.

Betty Wells is still planning to teach foreign languages in high school, unless radio offers prove more attractive.

Dance Class Begins

Ballroom dancing classes for beginners will begin today from 5 until 5:45 p.m. in the women's gym. Miss Lovaine Lewis, director, announced yesterday.

The class will meet on Tuesday and Friday of each week. Fundamentals dance steps will be taught.

New Worlds Fall To Rupp As Wildcats Conquer Vols

By JOE HODGES

"So there were no more worlds to conquer," drawled Coach Adolph Rupp after seeing his 'Cats subdue Tennessee's Vols, 36-33, Saturday in a long-to-be-remembered ball game.

Evidently the colorful Kansan made this statement in reply to Coach Johnny Mauer's insinuation that Tennessee was now too good for anything in the south, as far as basketball went.

The Vols, previously undefeated in the conference, and boasting a record which included only one loss for the season, an upset to Duke, found the boys trailing at half-time by one point, 20-21, the Wildcats soon hit their stride and kept the game well in hand throughout the last canto.

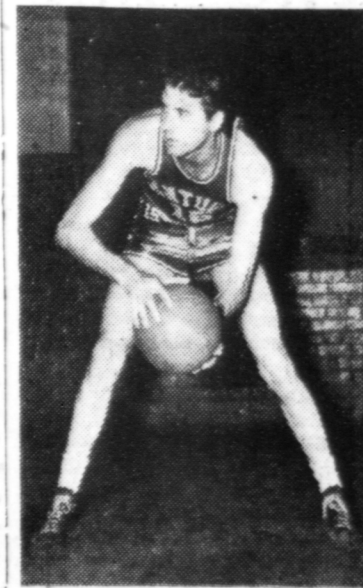

In a previous game at Knoxville, where the gym floor was as slippery as the local bowling alleys, the Vols managed to "out stand" the 'Cats, to win by the tune of 46-40. Unfortunately for the Tennesseans, there was no wax on the floor Saturday night.

Mel Brewer starred again for Kentucky as he turned in one of the best pivot games seen in Lexington since the days of All-American Leroy Edwards. His work, both offensively and defensively, was unsurpassable. Not only did he hold the Mehen brothers, but also managed to sink 13 points for himself to take high scoring honors.

Every Wildcat showed up exceedingly well. Cat-like Eral Allen even had Mike Baltaris, Vol guard, changing his glasses in order to get a glimpse of him. Captain Carl Staker taught "Houdini" Mehen a few tricks by tossing in five out of five free throws along with two field goals, to take runner up honors in scoring. As much could be said for every Wildcat that saw action.

The game was rough from start to finish, but interesting nevertheless. Thirty-two fouls were called, and three men from each team were banished by the foul route. The count was knotted four times, during the first half, but when the 'Cats went ahead after the start of the second half, they managed to lead by at least three points until the final whistle.

In short, it was an extra-special Kentucky-Tennessee entanglement, and should the same two teams meet in the tournament, civilians should evacuate for miles around.

MEL BREWER . . .

dropped in 13 points to lead the Cats to victory over the Vols.

Ping Pong Entries Are Due Today

The intramural department has announced that Ping Pong entries must be in not later than six o'clock this evening.

Czar Hackensmith wishes to emphasize that no entries will be accepted after this date.

Union college, Schenectady, N. Y., marks its sesquicentennial this year.

Fencers' Meeting Called For Today

An organization meeting of all women interested in forming a fencing team will be held at 2 p. m. today in the women's gym.

Managers of the sport, who will accept names of those who cannot attend the meeting, are Martha Allen, Peggy Howard, and Lovaine Lewis. After several instructional meetings a team will be chosen to take part in the tri-state tournament to be held this spring in Cincinnati.

For a long time we've sought a word to describe what we all work at hard here at Alcoa.

It takes a very special word to describe making aluminum cheap, making it versatile, finding totally new places to use it, and then helping people use it where they should. In war times it takes a very special word indeed to describe, also, the ingenuity and daring that can make, almost overnight, three and four and five times as much aluminum as was ever made before, and make it cheaper than ever.

IMAGINEERING is the word. What aluminum did for civilians, what alumi-

num is doing for our armed forces, what aluminum will do in the future, all come out of that one word.

Imagineering is letting your imagination soar, and then engineering it down to earth. At Alcoa we have engineers with almost every kind of diploma, scientists with almost every "key" we know. Yet whatever career they follow with us, their real field is Imagineering. They work at it hard. They get results. The importance of aluminum is their own doing.

We at Alcoa would like nothing better than that our company be known everywhere as the place they do Imagineering.

ONE PAGE FROM THE AUTOBIOGRAPHY OF

ALCOA ALUMINUM

This message is printed by Aluminum Company of America to help people to understand what we do and what sort of men make aluminum grow in usefulness.
